DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claims 51-57 are canceled.

Allowable Subject Matter

2. Claims 1-9, 17-24 and 31-40 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach a plated metal layer including a first layer formed on the first surface of the free portion of the spring metal finger and a second layer formed on the second surface of the free portion of the spring metal finger having a greater thickness than the spring metal finger as recited in claim 1; wherein the plated metal layer further includes a curved portion extending from the first surface of the substrate to the free portion of the spring metal finger as recited in claim 4; wherein the substrate defines a trench located below the free portion of the spring metal finger and shaped such that when the portion of the spring metal finger is deflected towards the substrate, the free portion enters the trench without contacting the first surface of the substrate as recited in claim 17; and further including a first and second intermediate portion as recited in claim 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
